

workplace environments

Applying our approach to integrating into dynamic organized structures, developing and upholding owner standards, and adapting to local cultures, Hargis has supported organizations' capital planning and implementation efforts on six continents. This has afforded us the opportunity to understand unique operating environments, build an in-house library of best practices and enhance the value we bring to the projects our clients entrust to our leadership.

As a part of our commitment to serving clients' global interests, we have engineers licensed in all 50 states, six Canadian provinces, Washington DC, Puerto Rico and a strategic alliance in Europe.
