

education | pre-k12

Our team has invested over 50 years in serving the K-12 community – developing strategies and approaches responsive to the programmatic needs as well as the evolution in design, delivery, and funding of school construction. We have contributed to advancements in technical solutions that improve the user/operators experience of the occupied environment. Likewise, our specialists have enlisted in a number of voluntary committees that help shape and share best practices for the betterment of the community.
