FOR IMMEDIATE RELEASE

*Market Leaders Promoted by Hargis Engineers*

January 27, 2017 – Hargis Engineers announced the promotion Jared Robillard to principal; Chris Skiles, David Bultez, Grant Jamison, Kevin Eldredge, Michael Baranick, Paul Robaidek, Rawley Reeser, Ryan Callahan and Shane Fischer to senior associate; and four new associates: Cori Anderson, Eric Mills, Jeff Hoover and Michael Daley.

Robillard is part of the next generation of Hargis' mechanical leadership team. He specializes in mission-critical, academic, student housing and civic spaces with current projects at CHI Franciscan | Highline Medical Center; Cascade, Wenatchee and Richland school districts; and Bellevue College and Shoreline Community College. He champions in-house initiatives that support professional growth and quality of staffs' work life experience.

Hargis' telecommunications and security specialists are recognized in this year's senior associate promotion. Skiles specializes in high-technology commercial environments. His contribution to urban vertical and horizontal enterprise campuses has served Amazon, Microsoft, S2 and HCL America shell and core and office tenant improvements. Bultez applies his knowledge of converged technologies to a number of prime infrastructure planning and upgrade projects for Western Washington University and several K-12 institutions. Eldredge's knowledge of telecommunications and audio-visual systems is serving Amazon's corporate office spaces throughout North and Central America. Robaidek applies two decades of institution planning and technology upgrades to lead 2- and 4-year academic institution, commercial enterprise and civic master plans and infrastructure upgrades. Fischer is leading high-technology acquisitions and new market office openings throughout Asia and Europe. Joining the leadership team as an associate is Cori Anderson who leads prototype/ standards development and system design for international high-technology clients.

Consulting engineers acclimated to serving high-end commercial retail spaces are joining the team as senior associates. Professional electrical engineers Jamison and Callahan are applying their combined 28 years of experience, respectively, to support high-end retailers' national and international operations. Utilizing 12 years of mechanical consulting engineering experience, Reeser is serving large volume, enterprise, high-end retail spaces. Baranick is applying his mechanical engineering background and his energy conservation knowledge to serve public and private clients alike.

Associates Eric Mills (mechanical) and Jeff Hoover (electrical) apply their knowledge of K-12 systems to serve Washington school districts including Bellevue, Issaquah, Lake Stevens and Northshore.

For more information, please contact Shannon Brush at (206) 448-3376.

Hargis Engineers is a mechanical, electrical, telecommunications, security, energy conservation and commissioning consulting engineering firm headquartered in Seattle, Washington. Established in 1955, Hargis serves eight market sectors on a local, national and international scale.
