

Imagining the POSSIBILITIES

What if? A simple question that opens the doors of the imagination to discover what's possible. It is the foundation of science—and a natural instinct that drives us to create spaces that inspire and connect.

Impact of Curiosity

What if... the crucial question driving every innovation, big or small. By harnessing the power of battery storage, renewable technologies, and resilient infrastructure, clients are turning to us to maximize their investment in [public assets](#) designed to perform under extreme conditions.

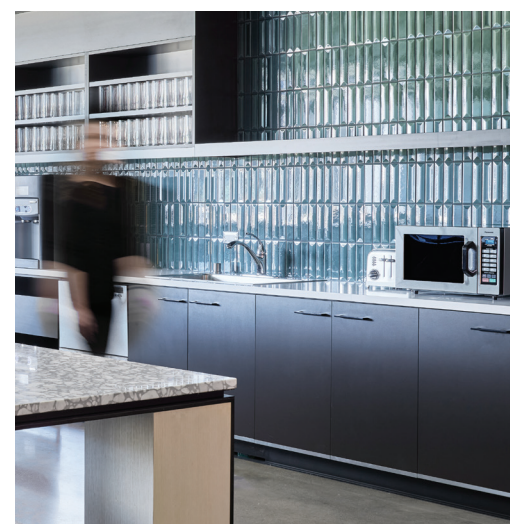

Consumer Technologies + Operations

Just as wireless connectivity revolutionized productivity and access to content in networked environments, Bluetooth technology is now fulfilling the promise of simple ease of connecting to an untethered device. As consumers increasingly embrace the convenience of one-to-one, temporary device pairing, the built environment is embracing applications that elevate the [user experience](#).

Hot Water Amenities

Since running water has become a staple in the occupied environment, so has hot water as an expected amenity. That goes hand-in-hand with office amenities that enhance the workplace experience. With changing codes and system configuration, landlord and tenants are viewing [hot water generation](#) in a different light.

Milestone Achieved

As the deadlines for Clean Buildings Performance Standard – Tier 1 Buildings protocol approach, one client was able to achieve compliance for their [entire operating](#) 6-campus inventory at minimal cost.

Turning 70

Technology has a way of reminding us of our generation. When asked to digitize a piece of media, younger colleagues curiously asked, "What is it?" Do you know [what it is](#)?

Code Corner

Our code whispers are breaking down WSEC, IECC, and ASHRAE 90.1, to help you navigate how these evolving codes impacts system selection and configuration options. Now [scheduling](#) in-person and remote AIA CEU-accredited sessions.
